9/11/68

Dear Paul, Gary, Hal and-

I have a few minutes while my wife assembled herself for our trip to DC, where I'll learn if the microfilm is ready, etc., I use them to ask you something I have been forgetting and recalled only this a.m.

Has any of you or your other fellows, Paul, gone over CD 1395? I am beginning to have suspicions that Brother Gemb stached a few goodies in it. It also was not forwarded the Commission until August, yet in the Other Persons and Organizations, under "Young Republicans", I find that there is a late July FBI report quoting Curry on a number of things that should have been in his testimony, including a subtle alibi for the feds in doing nothing about the NSRP threat in Denton (Ex 762) against JFK. Also alibis Elkins, the threatener, who was to be away.

Among the kinds of things that could be hidden therein is just this. This, however, could also be just a coincidence. Before I take the time to go through that file, to see if there were other hidden threats against the President, I am asking if any of you did.

If you have forgotten, this is the university bunch, who had been in touch with Walker, had been in on the Stevenson attack. The documents are careful to avoid this, but that is what Larry Schmidt took credit for. There is also an alibi for Walker in this report, saying he had left the day before for an undescribed other speaking engagement. He went to Shreveport, then to N.O., where he went to a Chamber of Commerce meeting addressed by one of the deans of American fascism, Harold Lord Varney who, by coincidence, had some years ago been on the Republican National Committee payroll.

Sincerely,

Harold Weisberg
